

VOICE OUTPUT SWIMMING TRACKER

INNOVATIVE PRODUCT

OVERVIEW

By using a bone conduction headset, it is designed to give you updates on your swim performance via clear-voice-feedback. Without any disruption to your swim stroke, pace is recorded and reported while you are swimming. On open swim mode, your swim performance is captured with GPS for safety. Furthermore, another mode is designed for swimming in a pool, which use motion sensors when there is no GPS reception. After swimming, you can use Bluetooth to connect your smart phone to review your data and update configurations.

FEATURES

GPS Swim Activity Tracking

In open water or in a pool, the sensor reports distance, splits and speed to you while swimming. It gives real time voice feedback.

Loud & Clear Navigator

The sensor talks to you by bone conduction, where sound is conducted to your inner ear through vibrations. For navigation, just set waypoints before you start swimming, the sensor will notify you when you reach each waypoint.

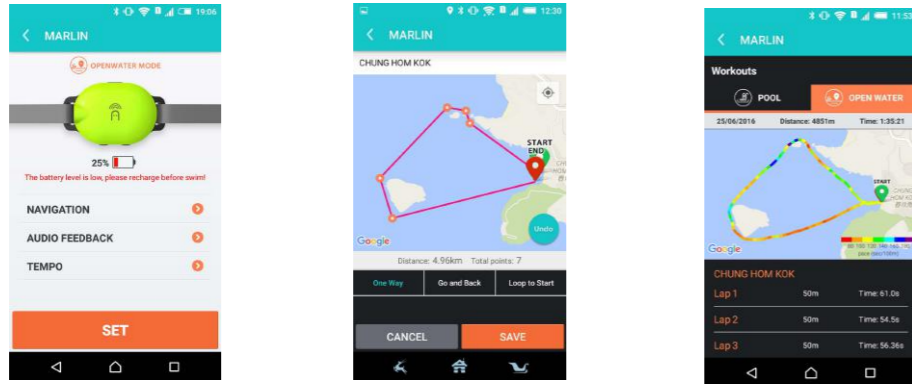

Personal Training System

You can define Personal training programs for training purposes via app and set your target pace for enhanced training.

FEATURES

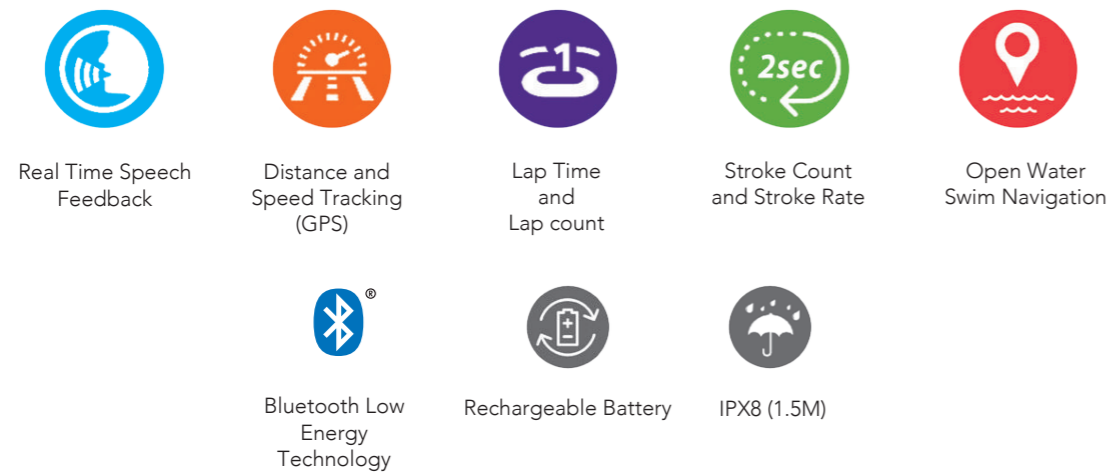

About The App

The App is available on iOS and Android. Users of the App can:

- Download data from App through Bluetooth
- Configure all settings on App
- Review previous workout summaries from pool to open water
- Define waypoints and set courses for navigation
- Configure session trainer programs and download to device
- Connect to leading sports platforms including Strava, Endomondo, Swim.com, SportTracks, Training Peaks
